EuroTank^{CE} BAF 2

Eurotank BAF2 is a pre-cast concrete wastewater treatment tank, certified to EN 12566-3 and NSAI SR66 standards.

We use Moving Bed Technology via a three-stage biological aeration-filtration system to treat sewage from domestic or light commercial premises.

Certified by PIA for PE ranges of 6 to 50, it comes fully built and delivered, ready for installation, with low maintenance requirements and high-quality effluent output.

KEY FEATURES

- Factory-finished unit supplied fully assembled for quick site turnaround
- Built-in flow regulation to ensure consistent treatment performance
- Designed to handle variable daily loading without performance loss
- Internal component layout optimised for easy access during servicing
- Resilient to groundwater and external pressure due to reinforced structure

Design – tailored systems for site

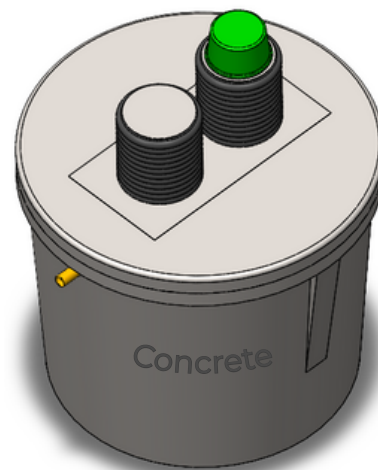

Installation – efficient, hassle-free setup

Supply – high-quality products delivered

Service – ongoing support and maintenance
